Windward Boatworks is looking to help you upgrade your program.

Are you looking to get a better boat or perhaps find a new boat but at a used price? How about helping us to find good and not so good used boats. What we are looking for are boats with good parts and not so good hulls so that we can put together packages combining new hulls and these good parts. These boats will be available for a great price depending on the cost of the trade ins. So if you know of that older Butterfly along the fence, sitting down at the club, or in the back of the garage it could get you into a recycled program for a great price. If your boat is a little tired but a newer hull sounds like just the trick, recycling your parts might be a great option.

If you do know of used boats we are also trying to get these boats into the hands of people wanting to learn to sail and race the Butterfly. We are willing to refurbish these boats and give them a second life in the Butterfly World. Help us to find these boats and give them a second chance. There are many people out there right now looking for that first Butterfly or that second boat to get their other children out racing. Help us to get the word out.

This refurbishing and recycling program gets more boats out racing and makes the Butterfly an even greater value.

Call us for a quote on this new program.

Sincerely,  
John Hayashi
